

# Cloud Networking

Global connectivity, simplified.

Unlock new possibilities with Zenlayer's hyperconnected cloud networking platform. Effortlessly connect to a diverse ecosystem of cloud providers, data centers, and global offices, and instantly access critical digital infrastructure across Asia, the Middle East, Americas, and Africa. Empower your business to scale faster, operate more efficiently, and stay ahead with enhanced speed, reliability, and flexibility.

## For Carriers:

- Reduce deployment times when building new infrastructure
- Expand network coverage
- Take services online and transform digitally
- Open new revenue streams through selling capacity online
- Optimize network operations and reduce maintenance costs

## For Data Centers:

- Global Reach: 300+ edge nodes and 130+ Tbps network capacity for seamless interconnection between data centers worldwide
- Flexibility: Port + bandwidth model enables data centers to offer on-demand services, improving tenant satisfaction
- Efficiency: Real-time monitoring and dynamic bandwidth allocation optimize resource utilization and operational costs

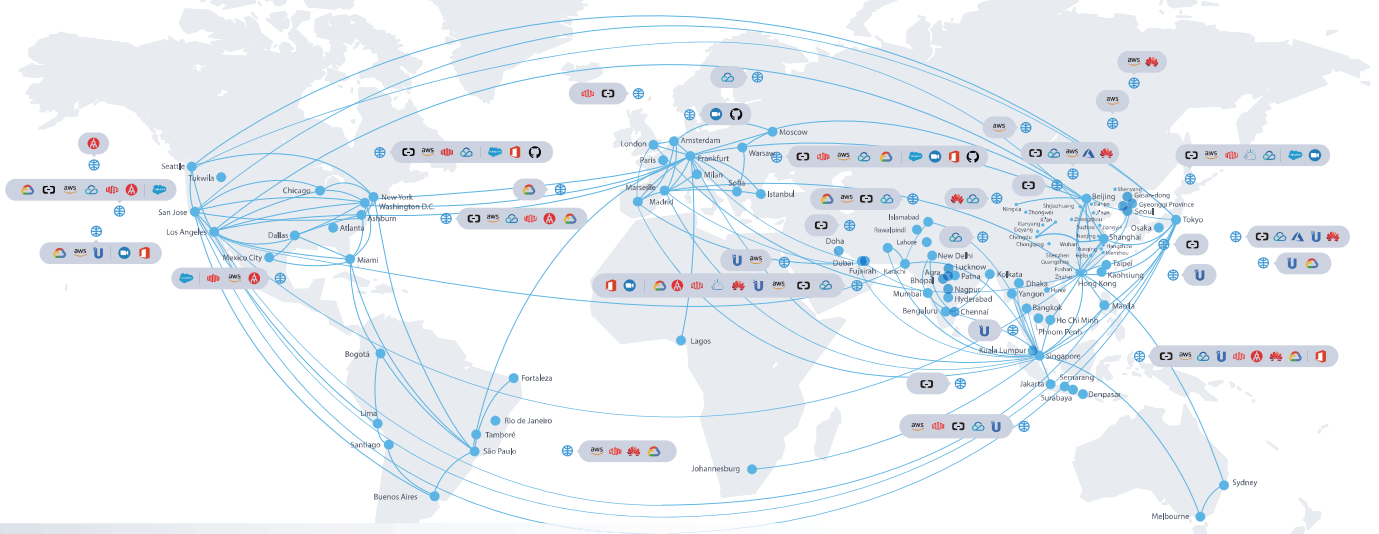

## For SD-WAN Providers:

- Scale backbone across 50+ countries to meet evolving customer needs
- Boost SaaS performance with Zenlayer's global PoP coverage and NNI interconnections in key regions like Hong Kong, ensuring faster, and more reliable service delivery

# Your Gateway to the World's Fastest-Growing Emerging Markets

With 300+ edge nodes strategically placed around the world, 300+ cloud onramps and a massive 130+ Tbps of network capacity, we're talking serious reach, even into some of the hardest-to-reach markets in the world. Access a global super highway built just for your business – fast, reliable, and ready to take you anywhere.

## Infrastructure

- Data Center

## Services

- Cloud Networking
- Bare Metal Cloud

## Public Clouds

- AWS
- Microsoft Azure
- Google Cloud

- Alibaba Cloud
- Tencent Cloud
- UCloud

- Equinix Cloud Exchange
- CoreSite Open Cloud Exchange
- Megaport

- IBM

## SaaS

- Salesforce
- Office365
- GitHub
- Zoom

## Why Zenlayer?

### Unmatched Global Reach

Leverage our unrivaled global footprint and strategically placed edge nodes to scale your business quickly

### Simplified Hybrid and Multi-cloud Deployments

Connect multiple clouds via a single port leveraging our pre-integrated partner on-ramps for simplified and efficient deployments

### Superior Performance

Zenlayer's private backbone ensures optimal performance with a 40% reduction in latency and jitter during peak hours and zero packet loss.

### Flexible Billing

Enjoy ultimate flexibility with diverse pay-as-you-go options for optimized network costs

### Intuitive Self-Service Console

Take control with our user-friendly, on-demand portal for streamlined network management

### Full Visibility & Control

Gain deeper network insights with our online monitoring and reporting tools

Your network deserves better. Let's talk. Schedule your free consultation today. Contact [info@zenlayer.com](mailto:info@zenlayer.com)
